EXPERIENCE

Jane Street Capital, Quantitative Trading Firm

New York, NY

Academy of Math and Programming Intern

Jul 2023

- Selected as one of 77 nationally for a rigorous 5-week program focused on **mathematical data analysis** and programming
- Developed trading strategies to automate market exchanges and placed 7th in Jane Street's Electronic Trading Competition
- Explored **combinatorics** and **number theory** with Math Olympians to solve complex linguistic and **game theory** problems

Cisco Systems, Technology Cooperation

New York, NY

Summer Extern

Jul 2022

- Formulated and presented technological solutions using Cisco services to issues posed in the public transportation sector
- Acquired certifications and an integrated understanding of **cybersecurity** and **IoT** through various NetACAD sessions
- Cultivated networking, communication, and vital team building skills while interacting with influential company executives

Mission Mentor, Harvard Technology Startup (acquired)

Boston, MA

Senior Software Developer

Aug 2021 – Apr 2022

- Delivered critical product features on the main **React.js** site, the **Java Spring Boot** backend, and **PostgreSQL** database
- Contributed to a cross-functional development team, worked on product backlog following the **Agile scrum** methodology
- Led standup meetings, discussed the company's next steps at team lead meetings, and **helped amass 10,000+ users** globally

My Fine Mind, 501c3 NJ Nonprofit Organization

Secaucus, NJ

Co-Founder, Chief Marketing and Technology Officer

Aug 2017 – Aug 2021

- Co-founded a nonprofit aimed at providing impoverished children with school supplies critical for their educational journey
- Raised \$25,000+ worth of school supplies for 300+ children who cannot afford adequate schooling in undeveloped areas
- Developed a website (<https://www.myfinemind.org/>) for donation transactions, merchandise sales, blog posts, and outreach

PROJECTS

Munch

<https://joinmunch.app>

React Native, Redux, AWS (Cognito, EC2, S3), PostgreSQL, GraphQL, TypeScript, React.js, Firebase

Oct 2023 – Present

- A **social culinary hub for college students** to buy/sell homecooked meals and discover recipes created by other students
- Developed a cross-platform mobile application with **cached state-management**, scalable **persistent data storage**, and a **gateway authentication** layer using **relational database systems**, a **Prisma** object relational mapper, and **AWS services**

Tutor Connect

<https://tutorconnect.sboe.org>

React.js, Firebase, TypeScript, JavaScript, HTML, CSS

Jul 2022 – Sep 2022

- A **cloud-based networking platform to connect students with verified tutors** within the Secaucus Board of Education
- Designed and implemented a site with a student dashboard (for filtering, searching, and connecting with listed tutors), a tutor dashboard (for managing tutor listings and connections), and an admin dashboard (to allow invited administrators to manage user permissions, verify tutors, and track tutoring progress) **used by over 500 students and 60 verified tutors**

Tileshift

<https://tileshiftgame.com>

React.js, Firebase, TypeScript, JavaScript, HTML, CSS

Dec 2021 – Jan 2022

- A **web-based word puzzle game** in which players must vertically align lettered tiles to spell words with limited moves
- Developed a site automatically generates a unique puzzle daily and has gained **over 125,000 hits** on Reddit with an estimated 410 players across 3 different continents and an average engagement time of 7 minutes and 40 seconds per user
